

MobileIron Enterprise Mobility Management Bundles

The MobileIron Enterprise Mobility Management [EMM] solution provides organizations with the platform required to secure mobile apps, content and devices. Users benefit from seamless access to the business processes and content on mobile devices of their choice, while providing IT the ability to secure corporate data on both corporate and personally owned mobile devices. By providing a modern EMM solution that supports both business productivity and IT security requirements, MobileIron enables today's enterprises to become truly Mobile First.

MobileIron's EMM bundles are specifically designed to support the three main phases of the Mobile First journey: 1) Device and Email Security, 2) Mobile App and Content Enablement, and 3) Business and IT Transformation. Each bundle provides essential capabilities required to successfully deploy each phase of the Mobile First journey. With the MobileIron EMM platform, organizations have the foundation they need to build a mobile security program that enables choice while addressing specific mobile security requirements.

MobileIron EMM Silver Bundle

The EMM Silver bundle provides all the essential capabilities required to build the foundation of a Mobile First enterprise. The EMM Silver bundle includes capabilities that allow for seamless device on-boarding, configuration of security settings, app distribution, policy enforcement and remediation.

- **Core** - Central administrative console
- **Sentry** - Secure enterprise gateway
- **Apps@Work** - Enterprise app store

MobileIron EMM Gold Bundle

The EMM Gold bundle is designed for customers ready to take the next step of the Mobile First Journey by providing secure apps and content on any mobile device. The EMM Gold bundle includes:

- **Core** - Central administrative console
- **Sentry** - Secure enterprise gateway
- **Apps@Work** - Enterprise app store
- **Email+** - Secure email/PIM app for iOS and Android
- **AppConnect** - Secure app container and app specific VPNs for AppConnect enabled apps
- **Docs@Work** - Security and access control for enterprise content repositories
- **Web@Work** - Secure web browser for iOS and Android

MobileIron EMM Platinum Bundle

The EMM Platinum bundle is designed for organizations that have a solid mobile foundation and are ready to enter the advanced stages of the Mobile First journey. The EMM Platinum bundle includes:

- **Core** - Central administrative console
- **Sentry** - Secure enterprise gateway
- **Apps@Work** - Enterprise app store
- **Email+** - Secure email/PIM app for iOS and Android
- **AppConnect** - Secure app container and app specific VPNs for AppConnect enabled apps
- **Docs@Work** - Security and access control for enterprise content repositories
- **Web@Work** - Secure web browser for iOS and Android
- **Tunnel** - Secure per app VPN
- **MobileIron Access** (iOS only) – Secure MobileApp-Cloud access for Box, Google Apps for Business, Office 365 and Salesforce
- **Help@Work** - Help desk tools enable remote viewing and control over end-user devices
- **ServiceConnect Integrations*** - Streamline IT workflows with the MobileIron App for Splunk Enterprise and integrations with ServiceNow

**ServiceConnect integrations available with the Platinum bundle includes MobileIron developed software to integrate with specific third party products and services. API based integrations do not require the purchase of the Platinum bundle.*

Note: Availability of certain capabilities might vary by mobile operating system. Please check with a MobileIron representative for availability.
